In what appears to be the closest Mod Of The Month Battle in Bit-Tech's History, our very own Milotic858 takes top honor. Her custom built C&C War Factory has been crowned August Mod Of The Month. Along with knowing she had the best mod in August, she also wins some great modding supply from AC Ryan. I know we all cannot wait to see what project she will come up with next.

You can check out the official announcement over at [Bit-Tech](#) . Also make sure to congratulate her over in her [worklog](#) .
