

 Have you ever wanted to see the awesome case mods by Team IRONMODS up close? Maybe you want to see the fog shooting out of the LN2 Pot as we take the processor and video cards to -196c. If you are in the San Francisco area, you now have the chance. Team IRONMODS will be participating in the Exploratorium special exhibition called, "Rods and Mods: The Kustom Kulture of Radical Computers Modification". This is a special 3 day exhibition highlighting the ever growing case modding and overclocking movement. Many similarities have been drawn by the Hot Rod movement of the late 60's. This is a 3 day event that will be held from February 11 to the 13th. Team IRONMODS cases will be featured for all 3 days, along with over a dozen other modders. We will be benching all day Saturday, so be sure to come check us out and say hi. For more information on the event, you can check out the press release here: ["Rods and Mod: The Kustom Kulture of Radical Computers Modification"](http://press.exploratorium.edu/rods-and-mods-february-2010/ "Rods and Mods").
If you can't make it, we will be sure to post some highlights of the event and videos on our YouTube page!!
