

MIAHALLEN first wrote an general Intel Core i3, i5, i7 overclocking guide this past January that was posted at overclockers.com. ♦ It has recieved a lot of attention in the enthusiast community and has alread had over 100K unique page hits. ♦ After recieving a lot of feedback, he made a major revision in Febuary, but it still was not perfect. ♦ So over the month of August, MIAHALLEN spent many hours drilling down to the core, and rewriting the guide, breaking it down into three more specific lessons on the particulars of overclocking Clarkdale, Lynnfield, and Bloomfield/Gulftwon based CPUs. ♦ Again, the new guides have bee recieved by the community, and have proved very popular. ♦ If you have not had a chance to read through them yet, and you'd like to learn more about overclocking these platforms, please stop by TechREACTION and check them out.
