

miahallen just completed his latest review with tons of great info for people looking at a new Sandy Bridge based system:

"In this review, I've dug much deeper into the Maximus IV Extreme and exploited its full potential with single, dual, and triple SLI configurations. I've included a much more thorough testing regime to better gauge the real world performance potential in this platform, and drawn full conclusions to better help you with your buying decisions. So is Sandy Bridge right for you? Do you need a Maximus IV Extreme? These are all good questions, read on for the answers."
