Cpt.Planet takes Core 2 E6700 wPrime 32m and 1024m records. His 1024m record is also the fastest dual core in 1024m of wprime.

The screenshot displays a Windows desktop with a blue sky and green grass background. Two utility windows are open:

- wPrime Benchmark v1.28:** Shows benchmark results for an Intel Core 2 Duo E6700. The 32M (speed test) has a best score of 18.36 sec, and the 1024M (stability test) has a best score of 579.453 sec. Both tests were performed at 4527 MHz. The CPU list shows two CPU0s and two CPU1s, both identified as Intel(R) Core(TM)2 CPU 6700 @ 2.66GHz with 4096 KB L2 Cache.
- CPU-Z:** Provides detailed hardware information for the Intel Core 2 Duo E6700, including processor name, code name (Conroe), package (Socket 775 LGA), technology (65 nm), voltage (1.213 v), and various clock speeds (Core Speed: 4560.1 MHz, Bus Speed: 456.0 MHz, Rated FSB: 1824.1 MHz).
