

In the section called Record Breakers, the The Overclocker e-magazine writes a small section on TiTON great accomplishment of taking the AMD World Records for SuperPi 1M and PiFast. In the screen shot caption, they state, “**Titon: AMD’s k|ngp|n?**”. Wow!!! What a great complement to our own AMD Bencher.

Now with Phenom II around the corner, lets see if TiTON can continue to raise the bar in the AMD world.

Congrats again on a job well done and being mentioned in the magazine.
