

Team IRONMODS has their hands on some of the rarest and most sought after AMD processors. We put two AMD Phenom II X4 42 TWKR Black Editions to the test and the entire adventure is captured in a picture story over at [Tom's Hardware](#). Head over there to see what type of insane benches we were able to do with these gems. (Hint: there is a CPUz screen shot at 6.4Ghz)

What you see at Tom's Hardware was just a teaser. We are going to push these processors even harder to see what type of performance they can yield. So stay tuned for more updates.
