From the last post, we had majority of the Dispenser completed. Now we are going to finish it off. Read on...

Currently the monitor seems very detached from the case mod. I wanted the display to appear integrated with the frame. To accomplish this task, I cut a piece of plexi as large as the opening, and then use a scroll saw to cut a window

For the ammo belt, I used the same size rounds as the entry

The magazine for the rifle is the base, to make it work with a magazine, I made a magazine with a belt. The magazine is made of plexi with a belt.
